Date: September 6, 2005

Subject: **HIGHLAND VILLAGE NTP (01-5301)  
RESUMPTION OF PROJECT**

This is in response to your memo of August 23, 2005. We concur with your assessment of conditions in the subject neighborhood area and agree that limited community support is outweighed by the increasing levels of adverse impacts created by cut-through traffic. It is unique to reverse a previous determination under the NTP ordinance, but the circumstances here are unique in themselves. Therefore I approve the resumption of the NTP process with the next pending action being the installation of the temporary mitigation devices previously presented to the Interdepartmental Review Committee and the community.

As it will be necessary to advise the community of the resumption of this project, I recommend our staffs work together to determine the best approach to accomplish this prior to actual installation of the devices occurring. Mr. Gary Schatz will be our point of contact for this matter.

A handwritten signature in black ink, appearing to read "Michael S. Marcotte 9/9/05".

Michael S. Marcotte, P.E., DEE

Handwritten initials "RD" in black ink.
